PROFESSIONAL SUMMARY

Frontend Developer focused on React, Next.js, TypeScript and Tailwind CSS. Builds clean, responsive interfaces, reusable components and API-driven pages for production web products. Practical experience includes dashboard-style UIs, authentication-aware flows, localized app screens, form validation, typed component structure and frontend architecture. Also learning AI/ML, which helps turn data and model outputs into clear product interfaces.

FRONTEND SKILLS

Languages	JavaScript, TypeScript, Python, SQL basics
Frontend	React, Next.js App Router, HTML5, CSS3, Tailwind CSS, Bootstrap
UI Systems	shadcn/ui, Radix primitives, reusable components, responsive design, dark mode, accessibility basics
Forms & Data	API data rendering, react-hook-form, zod, i18next, next-themes, JWT/session-aware UI
Tools	Git, GitHub, GitLab, npm, Vercel, VS Code, ESLint, Docker basics
AI/Data	pandas, NumPy, scikit-learn, Matplotlib, model result visualization

CORE WORKFLOW

- Build responsive pages and reusable React components from product requirements.
- Keep components typed, reusable and organized around route-local feature folders.
- Integrate API data, forms, validation, authentication-aware UI and localization.
- Use Tailwind/design tokens for consistent spacing, states and visual hierarchy.
- Validate work with lint/build checks, Git workflow and browser testing.

PROFESSIONAL EXPERIENCE

Frontend Engineer January 2026 - Present

Hiwelcome.uz - Tashkent, Uzbekistan

- Built production-facing web interfaces with React, Next.js, TypeScript and Tailwind CSS.
- Created reusable components and responsive layouts for API-based product pages.
- Worked on data display, UI logic, component structure and maintainable frontend implementation.
- Used Git/GitHub and typed development habits in a real product environment.

Frontend Developer February 2026

Delever.uz - Tashkent, Uzbekistan

- Developed responsive React/Next.js interfaces in a team environment.
- Improved component structure, layout consistency and user-facing page behavior.
- Strengthened practical frontend delivery across requirements, maintainability, review and implementation.

FRONTEND PROJECTS

Dwelve Frontend Platform

Next.js App Router, React, TypeScript strict mode, Tailwind CSS v4, shadcn/ui, i18next, react-hook-form, zod

- Building a frontend for exam/test automation: landing pages, authentication, dashboard flows, test workflows, student/class management and trilingual UI.
- Uses route groups, reusable UI components, typed schemas, localization catalogs and design-system-driven styling.
- Frontend supports product areas such as test creation, submission, automated grading and analytics.

Personal Portfolio Website

Next.js, React, TypeScript, Tailwind CSS, Framer Motion, Vercel

- Designed a clean developer portfolio focused on frontend development and growing AI/ML skills.
- Planned hero, skills, experience, projects, education and contact sections with a dark minimal visual direction.
- Uses personal branding, responsive layout, clear hierarchy and direct contact links.

EDUCATION

Frontend Development Program | 2022 - 2023

Proweb - Tashkent, Uzbekistan

- Learned web fundamentals and frontend structure: HTML, CSS, JavaScript, PHP and Webpack.

Frontend Development Program | 2024

IT Park - Tashkent, Uzbekistan

- Studied modern frontend tools and React-based work: React, Next.js, TypeScript and SCSS.

Full Scholarship Program in AI & ML | 2026

Bepro - Tashkent, Uzbekistan

- Studied AI/ML basics with Python data tools: pandas, NumPy, Matplotlib, Seaborn and scikit-learn.
-
