Frontend engineer at Hiwelcome, building for the web since 2022 and with React, Next.js, and TypeScript since 2024. I built two live multi-app platforms end to end, Dwelve and Volontyorlar, from the NestJS API to localized, tested Next.js apps, and I work across the stack into PostgreSQL, Redis, and machine learning.

EXPERIENCE

Frontend Engineer · Hiwelcome — Jan 2026 – Present

Next.js · React · TypeScript · Tailwind CSS · Firebase · zod

- Build pages and reusable components on the company's APIs.
- Work mostly on the main web app, plus the admin panel and smaller apps.

Frontend Developer · Delever — Feb 2026

- Built responsive pages and reusable React components in Next.js.

Machine Learning Engineer · Uzinfocom AI Labs (zehnmind.ai) — Sep 2026 – Present

- Prepare and quality-check speech datasets for ASR models; joined the core team after a three-week internship.

PROJECTS

Volontyorlar · volontyorlar.uz · volunteering platform — 2026

Next.js · TypeScript · TanStack Query · next-intl · react-hook-form · zod · NestJS · Fastify · PostgreSQL · Prisma · Redis · BullMQ

- Built the NestJS API and all five Next.js apps (volunteer, coordinator, organization, admin, public site) for a 4,000+ member community.
- Telegram, Google, and email sign-in with separate sessions per app; routes in Uzbek, Russian, and English; strict CSP.
- Typed API clients from OpenAPI, URL-synced filters (nuqs), a Tiptap blog editor, and three.js onboarding scenes.
- Vitest, Testing Library, and Playwright tests; Redis/BullMQ jobs and a Telegram bot on the backend.

Dwelve · dwelve.uz · exam and test platform for schools — 2026

Next.js · TypeScript · TanStack Query · next-safe-action · react-hook-form · zod · shadcn/ui · i18next · NestJS · PostgreSQL · Prisma · Redis

- Built all four apps: the API, the product app, the public site, and an admin console on its own domain.
- AI test import: a pdf.js page picker sends the chosen pages to Gemini, which drafts an editable test.
- Multi-tenant data with admin, teacher, and student roles; sortable question lists (dnd-kit), grade charts (Recharts), and a trilingual UI with validated forms.

Multi-Agent AI Analyst · document Q&A with cited answers — 2026

FastAPI · LangGraph · Gemini · Qdrant · PostgreSQL · Next.js

- Designed the backend and its OpenAPI + SSE contract for runs that stream progress and resume after a restart; generated the Next.js client with Claude.

Earlier projects

- **udevs**: Twitter-style community app with React, Apollo GraphQL, Material UI, and a Strapi backend.
- **Weather App** (React, OpenWeatherMap) and **Geometry Dash** (Canvas API, plain JavaScript), both live on GitHub Pages.

SKILLS

Languages	TypeScript, JavaScript, HTML, CSS, Python, SQL
Frameworks	React, Next.js (App Router, server actions), NestJS, FastAPI
UI	Tailwind CSS, shadcn/ui, Radix UI, Material UI, Motion, three.js, Tiptap, Sass
Data & forms	TanStack Query, react-hook-form, zod, OpenAPI typed clients, Apollo GraphQL, Firebase
Localization	next-intl, i18next (Uzbek, Russian, English)
Backend	PostgreSQL, Prisma, Redis, BullMQ, Strapi, Docker
Testing & delivery	Vitest, Testing Library, Playwright, ESLint, Prettier, GitHub Actions, Vercel, Git

EDUCATION

Full Scholarship Program in AI & ML · Bepro, with the World Bank and IT Park — 2026

Frontend Development Program · IT Park — React, Next.js, TypeScript — 2024

Frontend Development Program · Proweb — HTML, CSS, JavaScript — 2022 – 2023

Recognition: National and international AIMO medalist.
